SAINT LUKE DRAWING THE VIRGIN
Rogier van der Weyden
1435-38

Luke wrote the third Gospel as well as the Acts of the Apostles. A Greek physician who converted to Christianity, he was part of the community at Antioch and accompanied Saint Paul on some of his missionary journeys. In his Gospel, characterized by parables of charity, much attention is given to the infancy of Jesus, perhaps as the result of direct testimony from Mary.

Luke is depicted while writing his Gospel or painting the portraits of the Virgin Mary; his attribute is the winged ox.

PROTECTOR: *Physicians, Surgeons, Gilders, Glaziers, Illuminators, Notaries, Writers, Artists, Nurses & Hospital Chaplains*

NAME: *Luke is from the Latin and means "from Lucania."*
